

Prepared by: NIC TPMG

Sub: Storage Conditions

Ref: NIC Passive Components: Capacitors, Resistors, Inductors, Ferrites, Attenuators, Diodes, etc.

NIC Series: All

Termination Finishes: All (Sn-Pb and Lead-Free)

STORAGE

NIC recommends all products be stored under the following conditions:

1. Indoors
2. Temperature: +5°C ~ +35°C (41°F ~ 95°F).
3. Relative humidity: 40 to 75%.

Conditions outside these limits may adversely effect the packaging materials and/or the components' solderability characteristics.
