COMPANY PRESS NOTICE

February 07, 2000, Issue: 1197
Section: Technology Focus: Capacitors

Capacitor manufacturers seek to broaden their lines

Gina Roos

Capacitor makers are beefing up their product mix to offer customers a broader selection.

.....
.....

NIC Components Corp., Melville, N.Y., has expanded its product line. Previously, the company offered tantalum devices up to 330 mF, but that has now increased to capacitance values up to 470 mF. The company has also developed an ultralow-ESR tantalum device using a polymer cathode. The NTP series offers very low impedance and can handle high currents, according to NIC. The company also expects to offer MLCCs in 0201 packages later this year, and plans to expand its line of capacitor arrays while focusing on lower-loss, high-current aluminum-electrolytic caps for next-generation low-voltage, high-current circuits.
