

Antennas

Ceramic Chip
Ceramic Patch
External Mount & Cabled
External Whip Style
Fiberglass Rods
Flexible & Rigid PCB
FR4 Chip

Capacitors

Aluminum Electrolytic
Ceramic
Double Layer / Supercapacitor
Safety Rated & DC-Link Film
Tantalum

Magnetics

Chokes
Ferrite Chip Beads
Power Inductors
Signal Inductors
Signal Inductors
Ethernet Transformers
LAN Transformers
POE Transformers

Resistors

Axial & Melf Resistors
Current Sensing Resistors
Resistor Arrays
Thermistors
Thick Film Chip Resistors
Thin Film Chip Resistors
NTC Thermistors

Circuit Protection

Rectifier Diodes
TVS Diodes
Gas Discharge Tubes
VAC Rated Fuses
VDC Rated Fuses
ESD Protection Varistors
Over-Voltage Varistors

Company Profile

Since 1982, **NIC Components Corp. (NIC)**, in partnership with Nippon Industries Co. Ltd., has been a solutions provider in passive components to fuel the designs of technology and engineering organizations. As a leader in passive component technology, NIC's offerings of passive components — including a wide range of antennas, antennas, capacitors, magnetics, resistors, and specialty components — are built to meet the challenges of modern electronics design.

But while who we are today will guide us into the future, NIC has built its business by staying at the cutting edge of technology, manufacturing the passives needed to support a future of innovation. Our strong foundation helps us support the engineers and designers of tomorrow's technology through industry-leading reliability and performance.

NIC maintains engineering offices globally to oversee our production facilities and work closely with the factory sites for quality assurance and technology dissemination. Warehouse, engineering and sales offices in North America, APAC and EMEA support customer design, logistics and service requirements.

NIC offers global marketing & engineering support via our website to aid our customers in component selection and technical guidance. The NIC website offers one of the most comprehensive cross-reference databases in our industry. Technical data, including application notes, life test data and process guides offer engineers a one stop library for their passive component needs. Samples and sample kits are always available to help in component selection, the majority shipped from our extensive inventory.

The major advantage you will find when engaging with NIC is our people. NIC boasts one of the most experienced and highly trained sales teams in the world averaging more than 15 years of passive components experience. Our number one priority is customer support. From technical specifications to delivery information, from quoting large bill of materials to crossing our competitors' parts, NIC is capable of industry leading response times.

Please feel free to browse our websites. Contact your local distributor, sales representative or local NIC office listed on our websites, for quick personalized presentations.

Global Logistics Supporting Customers Worldwide

Major OEMs and CEMs rely on NIC to manage their inventory requirements and we continue to expand our logistic services. NIC Warehousing Facilities

| | |
|--------------------|----------------|
| Nevada, USA | 50,000 Sq. Ft. |
| Venlo, Netherlands | 20,000 Sq. Ft. |
| Tokyo, Japan | 7,500 Sq. Ft. |
| Singapore | 20,000 Sq. Ft. |

Quality

NIC's expertise and diligence in selection and integration of quality fabs is world-renowned. Long-term supplier relationships (averaging over fifteen years) have been fostered by shared strategy and partnering management teams. Every step, from component design to raw material selection, manufacturing processing to final inspection is meticulously monitored.

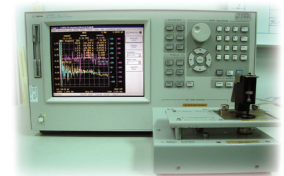

Automotive Grade Support

NIC offers specific series IATF-16949 certified lines, AECQ-200 qualified and PPAP ready for various NIC Product Lines:

- ♦ Antennas
- ♦ Aluminum Electrolytic Capacitors
- ♦ Multilayer Ceramic Chip Capacitors (MLCCs)
- ♦ Metallized Polypropylene DC-Link Capacitors
- ♦ EMI Suppression
- ♦ Power Inductors
- ♦ Resistors
- ♦ Thermistors

NIC Test Centers

Supporting Customers Worldwide:
Melville, NY, USA & Tokyo, Japan

Technology

NIC is not only a supplier of commodity components - NIC develops and supplies custom, specialty, and increased quality automotive grade products. NIC designs and manufactures components that meet the demands of today's emerging and cutting edge technology. We offer component solutions to build products with more features, in smaller and less expensive formats. From design to final production, NIC will be there every step of the way!

NIC has both the products & the tools to make your program easy from design to production.

- ♦ 200+ Registrable product series to support distributor design
- ♦ QuickBUILDER parametric search & side-by-side comparisons
- ♦ Reference designs & application based component selection.
- ♦ Focus products with dedicated stock to accelerate design.

- ♦ NIC offers electronic commerce and inventory management solutions customized to fit your needs.
- ♦ To support our customer's immediate and scheduled component demands, NIC maintains a running inventory of approximately 3 Billion components.
- ♦ We offer fully integrated solutions for VMI / In House Stores / Consignment / Forecast with Release & KanBan Inventory Management Programs

NICcomp.com One-Stop Online Resource

What You Need...When You Need It

With over 300 series of products to choose from, NICcomp.com makes sure you get everything you need.

All product pages center around the key component details to help you find the series you are looking for:

- ♦ Category, type and series dedicated pages for different levels of component information
- ♦ Filtered product lists to help component selection
- ♦ Co-Sells, alternatives & upgrades for best selections
- ♦ Technical & environmental information including packaging, compliance certifications, material declarations and soldering & handling guides

Get The Best Results with Focus Colors

NIC has created a 4-color system which spans across all NIC web and promotional tools to make sure you are selecting the best product for your designs:

- FOCUS** Best choice for new designs!
- STANDARD** Active and available for new designs
- NON-STANDARD** May require special conditions
- NFND** Not For New Designs

Resource Center

NIC has created a library of content, tools, and resources to help you accelerate your time to market and select the correct products to meet your needs.

- ♦ Access technical bulletins, data sheets, FAQs, presentations, specification documents, and more on our downloads page
- ♦ Global sales and technical contact forms & live help

Down To The Part Number With QuickBUILDER

Have a specific specification in mind? With thousands of individual parts, NIC goes beyond product types and series and lets you search and design with specific parameters! Not sure what family or part yet? QuickBUILDER searches all components in a technology to make sure you see what the best selection may be with side-by-side comparisons. Finish your search with individual specifications, distributor stock checks and order samples from NIC's dedicated FREE stock available today..

Key QuickBUILDER Features:

- ♦ Parametric searches with price & preference sorting
- ♦ Search by NIC part number or competitor
- ♦ Download and share individual specifications
- ♦ Compare results side-by-side
- ♦ View distributor stock

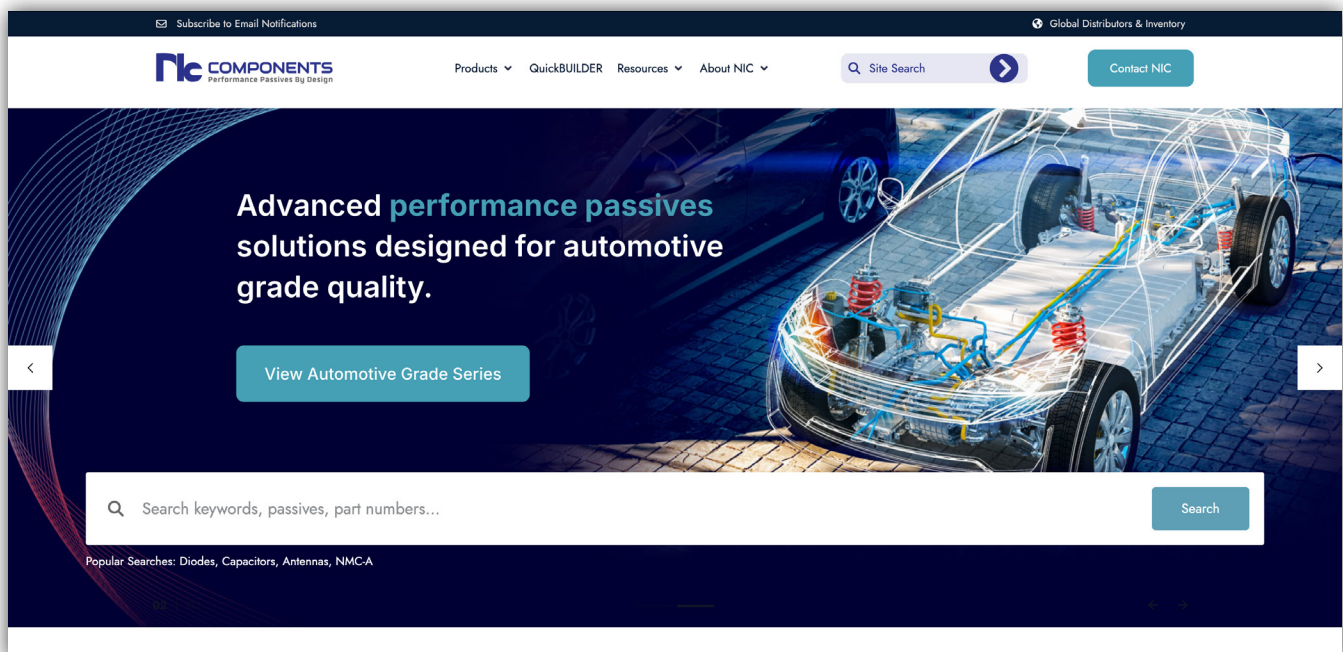

Tools With Your Design In Mind

NIC is always in development of the latest design tools to help get you the right parts or information as quick as possible.

- ♦ Cross referencing built into text searches
- ♦ View products by application, technology, and more.
- ♦ 3D rendering and step files by part number
- ♦ Spice models and s-parameter simulation data
- ♦ Global Environmental Compliance Guide

View NIC Franchised Distributors & Sales Reps

NIC sales, support, and logistics efforts are augmented by a global network of franchised distributors. NIC's franchised distribution network includes three major global distributors, as well as more than 40 regional distributors throughout the Americas, Europe, and Asia.
